CloudStoragesSDK 集成指南

1. 导入 CloudStoragesSDK

将 sdk 文件夹添加到项目中,如图所示:

2.添加依赖框架(FrameWork)

打开项目设置中的Build Phases页,在"Link Binary With Libraries" 一栏中,点击左下角的"+"号,在弹出框中添加下面框架: storeKit.framework

SystemConfiguration.framework

QuartzCore. framework

Security. framework

MobileCoreServices.framework

libxml2.dylib

UIKit. framework

Foundation. framework

CoreGraphics. framework

CFNetwork. framework

libz. dylib

如图所示:

3. 设置所有云端的 AppKey

打开 sdk/sur/CSCloudServerConfigurator.m 文件,根据需求设置各个云端的 AppKey 相关信息(每个云端的 AppKey 都需要到相应官网上进行应用登记后,取来的相关信息)。如图:

```
- (NSString *)boxClientID{
▶ im frameWork
                         24
                                 return @"vdxobv1jtbin3golalsov3skmvrnnu5x";
 ▶ ■ ASIHTTPReqest
                         25 }
   a backArrow_black.png
                         - (NSString *)boxClientSecret{
   CSCloudServerConfigurator.h
                                 return @"DCeH9lfS6Mcb2odtjG29gdBFqVJDG7W0";
                         28 }
 ▶ 🛅 frameWorl
   GTMOAuth2ViewTouch.nib
                         - (NSString *)dropboxCosumerKey{
   GTMOAuth2Window.nib
                                 return @"no2ju306lkesmpg";
   LiveAuthDialog_iPad.nib
                         31 }
   LiveAuthDialog_iPhone.nib
                         - (NSString *)dropboxCosumerSecret{
h AppDelegate.h
                         33
                                 return @"e7txknyenfds1b8";
 AppDelegate.m
                         34 }
 Main_iPhone.storyboard
 Main_iPad.storyboard
                            - (NSString *)googleDriverClientID{
                                 return @"899818209298.apps.googleusercontent.com";
 ViewController.h
 ViewController.m
```

备注:

示:

Box 申请 ClientID 和 ClientSecret 网址:

https://developers.box.com;

DropBox 申请 ClientSecret 网址:

https://www.dropbox.com/developers

GoogleDrive 申请 ClientID 和 ClientSecret 网址:

https://code.google.com/apis/console/

everNote 申请 AccessKey 和 Secret 网址:http://dev.evernote.com sugarSync 申请 AppID 和 AccessKey、privateAccessKey 网址:

https://www.sugarsync.com/developer/account

skyDrive 申请 ClientID 网址: http://dev.live.com

4. 配置 URL Schemes

1. 打开*-Info. plist (*代表你的工程名字),在配置文件中新增一项 URL types(如果存在可以不创建),展开 URL types - URL Schemes,在 URL Schemes下新增一项用于 DropBox 授权 AppKey:db-(DropBoxAppkey)和另一项属于 Evernote 授权 AppKey,如下图所

▼ Information Property List		Dictionary		(17 items)
▼ URL types		Array		(1 item)
▼ Item 0		Dictionary		(2 items)
▼ URL Schemes	100	Array	*	(2 items)
Item 0		String		db-no2ju306lkesmpg
ltem 1		String		en-eleeditor
URL identifier		String		
		e		

2. 本sdk使用到了ASIHTTPReqest库它不支持ARC模式的文件,所以如果是在ARC模式下需将它所有文件的arc 禁止(-fno-objc-arc),具体如图所示:

5. AppDelegate. m文件配置

- 1.在AppDelegate.m文件中,导入头文件#import <CloudSDK/CSCloudServer.h>
- 2.在- (BOOL) application: (UIApplication *) application didFinishLaunchingWithOptions: (NSDictionary *) launchOptions 函数中,添加代码: [CSCloudServer setCloudConfigurator];

```
3. 在- (void)applicationDidBecomeActive:(UIApplication*)application函数中添加代码: [CSCloudServerhandleDidBecomeActive];
4. 在- (BOOL)application:(UIApplication*)applicationopenURL:(NSURL*)url sourceApplication:(NSString*)sourceApplication annotation:(id)annotation{return [CSCloudServer openURL:url];}
```
